

Technical Data

T. A. T. Broth Base

M562

T.A.T. Broth Base with added polysorbate 20 is used for sterility testing of highly viscous or gelatinous substances such as salves, ointments and other cosmetic products.

Composition**

Ingredients	Gms / Litre
Casein enzymic hydrolysate	20.000
Azolectin	5.000
Final pH (at 25°C)	7.2±0.2

^{**}Formula adjusted, standardized to suit performance parameters

Directions

Suspend 25 grams in 960 ml distilled water and add 40 ml of polysorbate 20. Heat if necessary to dissolve the medium completely. Dispense as desired and sterilize by autoclaving at 15 lbs pressure (121°C) for 15 minutes.

Principle And Interpretation

T.A.T. Broth is prepared according to the formula recommended by United States Food and Drug Administration (1) for enrichment and further isolation and cultivation of gram-negative bacteria in cosmetics, tropical drugs and in the sterility testing of viscous or gelatinous substances. It is especially adapted for the testing of cosmetics.

Cosmetics and pharmaceutical products are subject to contamination during manufacturing and subsequent use by consumers (2). Preservatives are used in aqueous products to make them self-sterilizing for vegetative bacteria, yeasts and moulds, and bacteriostatic or bactericidal for spores (2).

Casein enzymic hydrolysate provides the nitrogen, vitamins, amino acids and carbon in T.A.T. Broth Base. Azolectin and polysorbate 20 neutralize preservatives in the cosmetics or pharmaceutical products, allowing bacteria to grow.

Prepare decimal dilutions of the sample to be tested from 10-1 to 10-6. Inoculate 1 gram (1 ml) sample and 1 ml of each dilution into 40 ml of T.A.T. Broth (3). After incubation, subculture the growth on MacConkey Agar (M081) and TSI Agar (M021).

Quality Control

Appearance

Off-white to yellow homogeneous free flowing powder

Colour and Clarity of prepared medium

Light yellow coloured clear to slightly opalescent solution

Reaction

Reaction of 2.5% w/v aqueous solution containing 4%v/v polysorbate 20 at 25°C. pH: 7.2±0.2

pН

7.00-7.40

Cultural Response

M562: Cultural characteristics observed after an incubation at 35-37°C for 24-48 hours with added Polysorbate 20.

Organism	Inoculum	Growth
	(CFU)	
Bacillus subtilis ATCC 6633	50-100	good-luxuriant
Candida albicans ATCC	50-100	good-luxuriant
10231		
Pseudomonas aeruginosa	50-100	fair-good
ATCC 27853		
Salmonella Typhi ATCC	50-100	good-luxuriant
6539		
Staphylococcus aureus	50-100	good-luxuriant
ATCC 25923		

HiMedia Laboratories Technical Data

Staphylococcus aureus 50-100 good-luxuriant ATCC 6538

Pseudomonas aeruginosa 50-100 fair-good

ATCC 9027

Storage and Shelf Life

Store below 30°C in tightly closed container and prepared medium at 2-8°C. Use before expiry period on the label.
